INFS2605 Intermediate Business Programming

INFS2605 Group Assignment Project Form

- It is your team's responsibility to ensure that your source code deliverable ships with a runnable JAR file. **Submissions that do not run (or indeed, do not compile) could result in a ZERO mark for the source code deliverable of the assignment.**
- Academic honesty is expected. An incomplete or deceptive project form (i.e., a form that very obviously claims more completed than actually completed) could result in 10% being deducted from your final mark for the assignment.

Feature	Attempted?	Completed?	Notes (if required)
(UM) Basic Requirements for User Management	Yes	No	We were able to generate a user code, but unable to store the access codes on the database
(DM) Basic Requirements for Data Management	Yes	No	We haven't been able to save new guests/events
(JF) Basic Requirements for Journey and Flow	Yes	Yes	
(AF1) Invitation PDF	Yes	No	We were able to generate a single pdf for a single user.
(AF2) Event Runsheet Builder	No	No	

Additional comments:
A team member dropped the course without prior notice. This left us severely disadvantaged, as we were left with 3 members to complete the remaining sections of the assignment. This also impeded our ability to complete all five sections of the assignment.
